Lab 3: Shell scripting

IT 204

January 25, 2016

Instructions

- The objective of this lab is to study shell scripting.

- All the submission MUST be made from your IIITV mail account.

- Submission format: Name of the compressed folder: `Lab3_<your_ID>.zip` codes: `<problem#>.sh`. e.g., for the second problem, the filename should be `two.sh`.

Problems

- Write a shell script to sort `n` (`n` is any number) numbers using bubble sort.

- Write a shell script to generate the following pattern. Generate the similar pattern for `n` (`n` is any number) lines.
